

Make Your Course Accessible with YuJa Panorama

Quick Guide

YuJa Panorama helps you create accessible learning materials and monitor accessibility in your courses. **DocHub** is used to upload and fix files before placing them in your course. YuJa Panorama in the Moodle LMS is used to scan and review content that's already inside your course.

1

DocHub

(Fix Files before using in Course)

- 1 Download your file from Google Drive
- 2 Upload file into DocHub
- 3 Review and fix accessibility issues
- 4 Reach 100% on report.
- 5 Download the accessible file and upload to google drive.

2

YuJa Panorama

Hidden from students

Panorama LTI

(Course Report & Inline Fixes)

- 1 Navigate to your Moodle Course.
- 2 Select the Panorama LTI tool.
- 3 Select Files & Issues
- 4 Select File to view accessibility report and issues.
- 5 Utilize Fix Issue and Learn More to make inline changes.

3

YuJa Panorama

(Inline Fixes in Moodle Course)

- 1 Click the Panorama accessibility score icon in your course.
- 2 Review accessibility score and issues
- 3 Utilize Fix Issue and Learn More to make inline changes.

IMPORTANT TIP

You can use **Refresh Report** after updates

Avoid **Reprocess Course** (this will reset previous fixes)

Need Help?
Email us at .edu

If you do not have full access (for example, if you do not see the accessibility report or gauge), please reach out so your role can be adjusted. Additionally, you may briefly see an "access denied" message for a few seconds before the SSO login screen appears. This is expected behavior and will resolve automatically.
